## EASY and Affordable Quality Healthcare

For many people in Hawaii, health insurance is not a feasible option - but what can you do when you or your children are sick or need a physical examination? **The Medical Corner** solves that problem by providing quality healthcare with minimal fees to people who are uninsured. "EASY Care is a program that offers folks with no insurance a plan that they can trust," says owner and physician Dr. Robert Sussman. "It's also convenient, with our four locations: Kailua, Airport, Kapolei, and Waikiki."

Enrollees pay only \$40 for an office visit and are given the option of paying \$20 monthly or \$200 for one full year of membership. All enrollees are entitled to an annual wellness physical (\$250 value) after one year or immediately after paying the yearly membership (and saving \$40). The EASY Care plan offers discounts on office visits, lab fees, medicines and other services. Corporate and Family Plans are also available. "Many people pay over \$800 per month for their health care plans, and it will continue to go up" says Dr. Sussman. "This program is not insurance but a discount plan intended to complement high deductibles, flexible spending plans, health savings accounts, and those people with no insurance at all." We can help college kids not covered by parents' plans or part time employees not eligible for insurance. The doctors at The Medical Corner

believe that it is important for everyone to have access to quality healthcare, complete with a regular doctor who knows you and your needs. They offer a complete host of services, including physical examinations, immunizations, flu shots, cancer screening and weight loss assistance.

The offices take walk-ins, appointments and house calls. Visit any of their convenient locations to become more familiar with the EASY Care plan. -Joy Uyeno
